ODAM Report No. 8-86 April 1986

PREFACE

The Bureau of Health Professions provides national leadership in the development of the personnel required to staff the Nation's health-care delivery system, targeting resources to areas of high national priority, such as: increasing the supply of primary care practitioners; improving the distribution of health professionals both geographically and by specialty; ensuring the availability of adequately prepared health professionals for such specially targeted areas as disease prevention, health promotion, geriatrics, and bedside nursing; monitoring, analyzing and projecting the supply, requirements, and distribution of health professionals; and assuring access to health careers for the disadvantaged. In order to accomplish its mission, the Bureau provides financial support to a variety of institutions and individuals through grants, contracts and cooperative agreements.

This report -- Directory of Awards: BHPr Support, Fiscal Year 1984 -- provides detailed program information on all grant awards made by the Bureau from October 1, 1983, through September 30, 1984. The report is based on final data compiled from the Information for Management, Planning, Analysis, and Coordination (IMPAC) System on grants, student aid, and other support provided by the Bureau of Health Professions for health-care personnel education and development. The IMPAC System is a computer service maintained by the National Institutes of Health to process centralized extramural awards made by agencies of the Public Health Service.

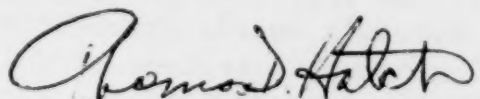
The first and major section of the report (pages 1 through 158) presents an itemized directory of the Bureau's awards which provides detailed information by each of the 10 geographic regions of the Department of Health and Human Services. Within each region, the data are reported in sequence alphabetically by State, city, institution, and the program-code portion of the grant number and, finally, numerically within each program code. A brief designation of the program activity supported by each award is given under the column heading "Area of Support." The last data item reported is the dollar amount of funds awarded.

The second section of the report presents four summary tables which provide, respectively: Table A) the number of awards and amount awarded, by program; Table B) the number of awards and amount awarded, by State and program; Table C) the number of awards and amount awarded, by program and State; and Table D) the number of awards and amount awarded, by State.

In these summary tables the identification of a coded activity under the column heading "Program Title" is limited to the same generic wording -- for example, every Code D 23 program is identified as "Advanced Nurse Training." However, in the main directory (pages 1-158) the designations for some of the programs are more explicit and informative. For example, main directory entries for the same D 23 programs identify the specific type or field of advanced nurse training, such as: "Geriatric Nurse Program," "Acute Care Nursing of Hospitalized Children," "Graduate Education in Nursing Administration," "Research in Community Health Nursing," and so on.

Occasionally, the reader may detect some spelling errors. These errors are in the original computer file from which the tables presented here were generated and have not been corrected because of time and cost considerations. The dollar amounts, however, are correct.

This report was prepared in the Bureau's Office of Data Analysis and Management, Mr. Howard V. Stambler, Director, by Mr. Frank M. Holz, program analyst, and Mr. Samuel D. Rosenthal, statistician, of the Information Systems Branch, Mr. Roger D. Cole, Chief.



Thomas D. Hatch
Director
Bureau of Health Professions
